

Holistic Health Hub

COMMUNITY PHARMACY OPPORTUNITY

REBRAND DIRECTION · MODERN APOTHECARY

A private medical cannabis service built for community pharmacy

Holistic Health Hub is the brand your patients see, the platform your team works in, and the service that does the work in between. We connect your pharmacy to a CQC-registered specialist clinic and an MHRA-licensed manufacturer, handle the referral admin and provide continuous support — so you can offer a new private service effectively and compliantly.

Our mission is to help people take charge of their health with evidence-based medical cannabis treatments— delivered with specialist care, face to face, through the community pharmacies they already trust.

HHH AT A GLANCE

The clinic prescribes.
You dispense.
We handle everything in between.

Holistic Health Hub is a private healthcare service that runs through your pharmacy.

[1.8 million people self-medicating in UK](#)

Live in independent pharmacies nationwide.

Training and support provided.

Prescribing liability sits with the clinic-not you.

Patients are screened online or at your counter, assessed and prescribed virtually by GMC-registered specialists at a CQC-registered clinic, and collect their medicine from you — the pharmacy they already trust.

Modernise Your Clinical Offering. Insulate Your Business.

THE COMMUNITY PHARMACY OPPORTUNITY.

Running an independent pharmacy has never demanded more of you. Tariff pressures, unpredictable clawbacks, and footfall drifting online are squeezing margins tighter than ever. Relying solely on NHS dispensing is no longer sustainable.

Private Services- A Logical Solution

Private clinical services must be operationally seamless and built to scale. The ideal service creates a balanced healthcare ecosystem: patients gain affordable access to innovative therapies unavailable on the NHS, while your pharmacy unlocks a predictable, resilient revenue stream.

Why CBPMs?

Cannabis-Based Products for Medicinal Use represent a high-growth clinical market. Since legalisation in 2018, UK patient demand has accelerated year-on-year. What has kept community pharmacies out isn't a lack of interest—it's a lack of strategic marketing and the overwhelming operational and regulatory complexity of managing private Schedule 2 prescriptions.

That Is the Burden We Lift.

Holistic Health Hub is your seamless bridge into the medical cannabis sector. Our partnered, CQC-registered specialist clinic (Curaleaf) absorbs the clinical and prescribing liability, your pharmacy captures the secure private dispensing revenue, and our platform intelligently automates the compliance and workflow in between.

CLINICAL FOUNDATIONS & REAL-WORLD EVIDENCE

CLINICAL GOVERNANCE & PATIENT SAFETY

Regulatory Framework

CBPMs are unlicensed (specials) schedule 2 Controlled Drugs. By law, they must be initiated exclusively by a consultant on the GMC Specialist Register, only when there is a clinically unmet need. While Pharmacist Independent Prescribers (IPs) cannot prescribe these unlicensed specials autonomously, they play a vital role within a delegated shared-care framework. They can work under the direction of the initiating specialist to manage patient titration, adjust dosages, and provide safety monitoring crucial for these complex treatment pathways.

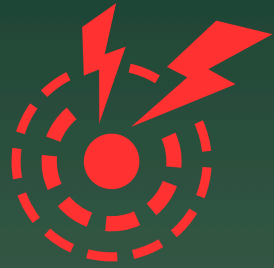

Prescribing Criteria

Our clinical protocol strictly mirrors UK best-practice frameworks: CBPM therapy is only indicated after conventional, licensed treatments—usually a minimum of two first line medications—have failed to yield adequate therapeutic efficacy. This rigorous regulatory and clinical gate is embedded into every patient pathway on our platform, guaranteeing compliance, patient safety, and robust audit trails. There are over 35 conditions that can be treated with medical cannabis. Most conditions are related to chronic pain and psychiatric conditions.

Growing Evidence Base

While the UK medical cannabis market features MHRA licensed treatment options like Sativex® and Epidyolex®, the majority of access relies on unlicensed CBPM 'specials'. This sector is backed by a surging volume of complementary real-world data. Independent pharmacies are ideally situated to provide the specialised, high-touch care required for these alternative pathways, directly contributing to the evolving clinical evidence base.

55.1% → 22.1%

Opioid reliance reduction

Chronic Pain

Chronic pain affects between 35% and 51% of the UK population, frequently leaving patients dependent on long-term analgesics.

Data published from Drug Science's T21 registry tracking chronic pain patients found that after three months of managed CBPM therapy, the percentage of patients relying on prescribed opioids dropped significantly from 55.1% down to 22.1%. Over half (59.9%) of those using opioids were able to cease their opioid medication entirely.

Chronic Pain accounts for 50% – 56% of conditions treated with CBPMs.

–4-5 points

GAD-7 score improvement

Mental Health

Psychiatric conditions—primarily generalized anxiety disorder (GAD) and PTSD—make up over 30% to 42% of the total medical cannabis patient population in the UK.

Observational studies from the UK Medical Cannabis Registry (published in Expert Review of Neurotherapeutics) show that patients prescribed CBMPs for anxiety experienced statistically significant, sustained reductions in their GAD-7 scores alongside marked improvements in sleep quality and general health-related quality of life.

Psychiatric Disorders accounts for 30% – 42% of conditions treated with CBPMs.

All Adults

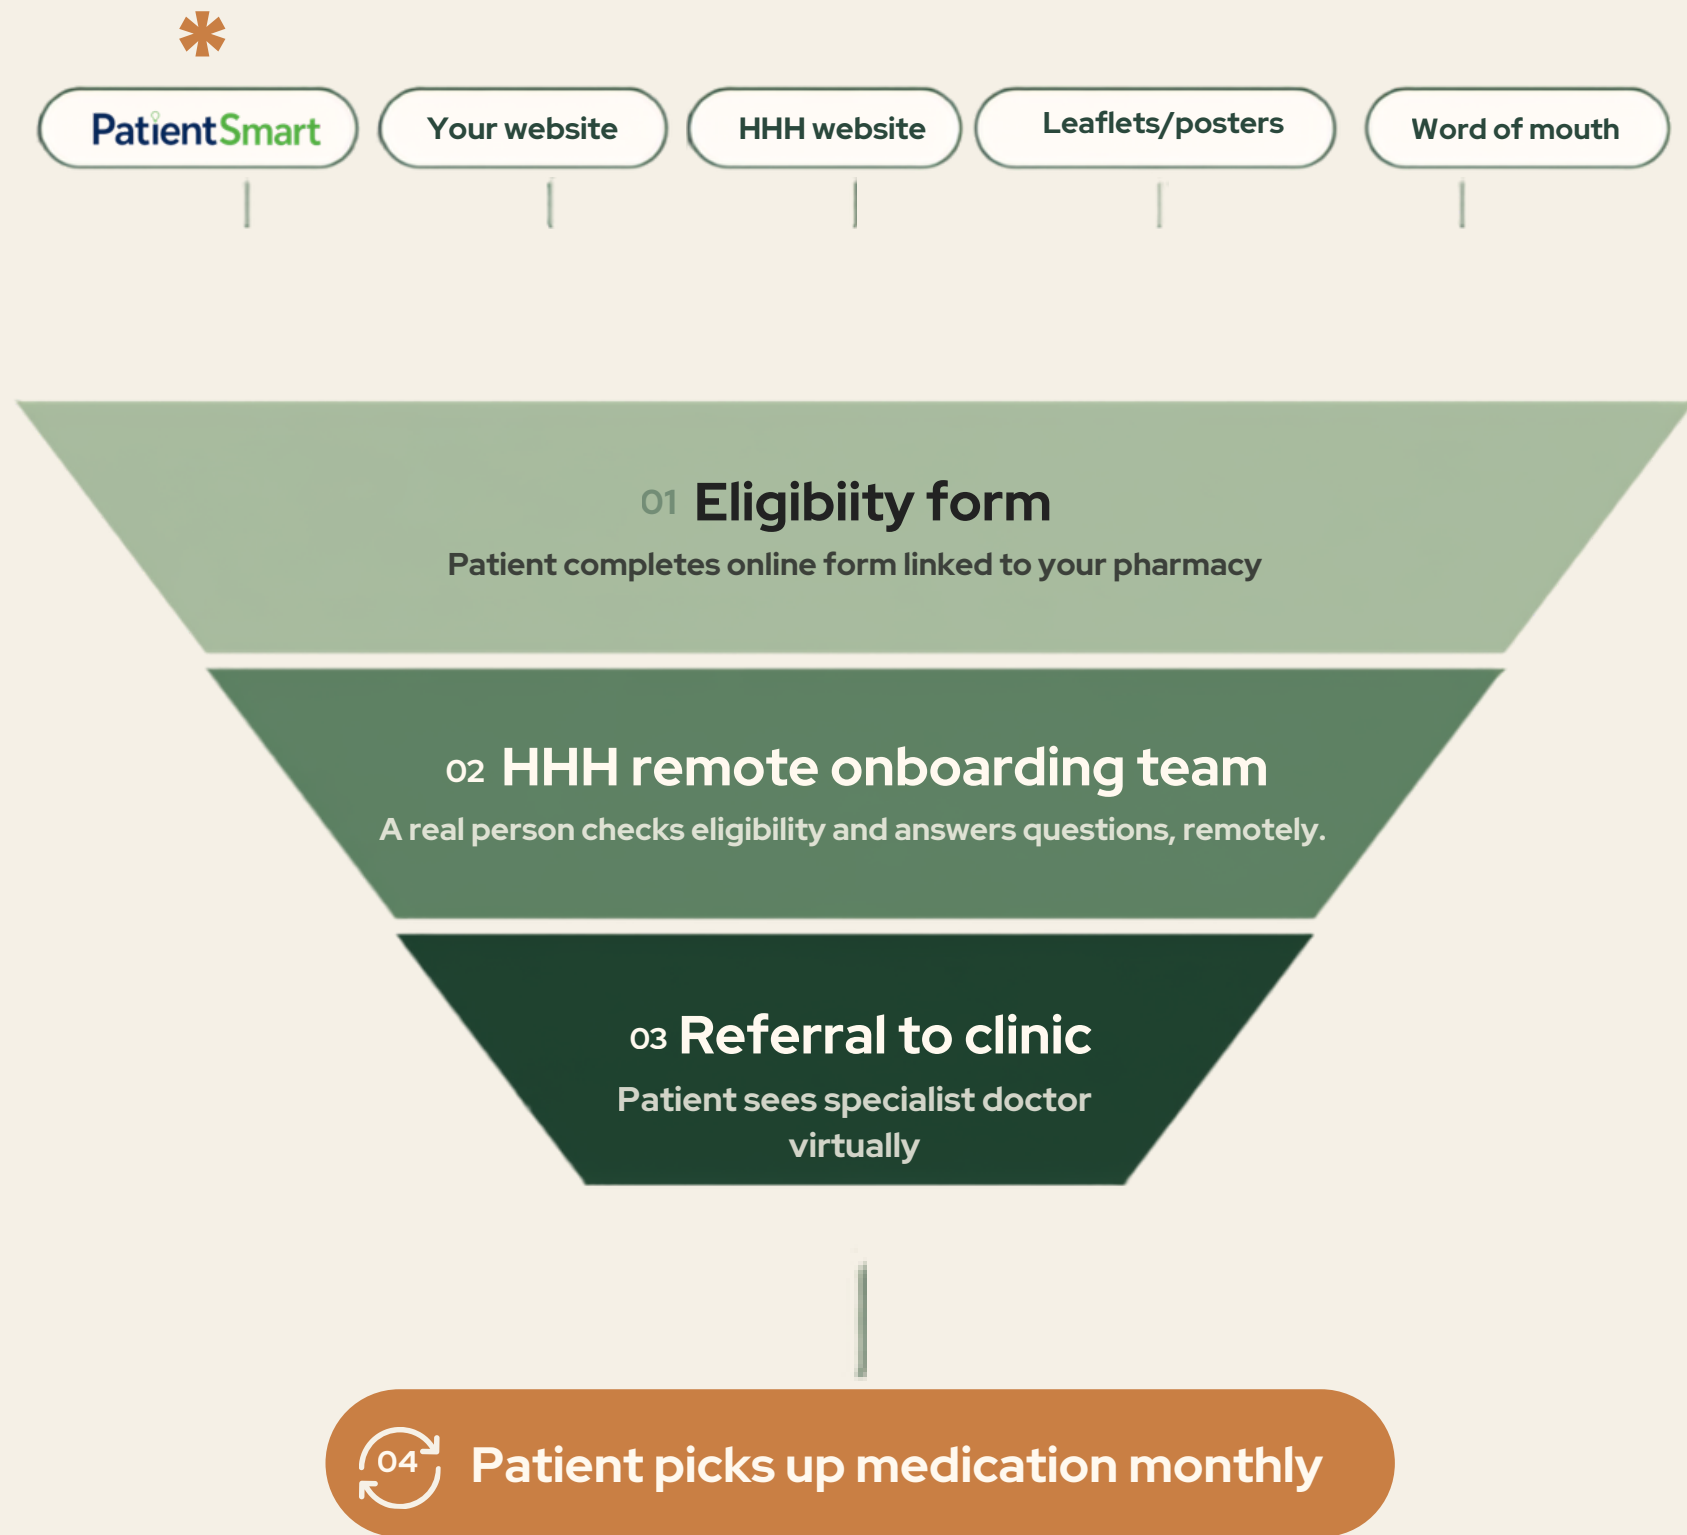

Demographic reach

Reaching Every Adult Demographic

This clinical service serves a deeply diverse adult patient profile, spanning all adult age groups, genders, and socioeconomic backgrounds.

Moving healthcare beyond digital-only spaces, your physical pharmacy counter acts as the crucial face-to-face link for vulnerable, isolated, or older patients who require localised professional oversight that pure telehealth models leave behind.

The average age of a UK private medical cannabis patient is ~38 to 45 years old

*5–10% conversion rates when marketed via text, through PatientSmart

THE 4-STEP PATIENT JOURNEY

One clear pathway, regulated at every step.

1 Intake

A patient completes a short online eligibility form — through your pharmacy website (we can integrate this for you) or a QR code found on posters/leaflets/digital ads we can provide.

2 Remote Onboarding

HHH remote onboarding team refer eligible patients to Curaleaf clinic and ensure they understand the process and costs involved.

3 Clinical Review

Eligible patients book a remote consultation with a specialist (£30, paid directly to the clinic). Where clinically appropriate, the specialist issues a private CBPM prescription and transmits it securely to your pharmacy.

4 Dispense & Collect

You send the patient a secure payment link, then order stock all directly from the HHH platform. Finally hand out the medication to your patient on a monthly basis.

PLATFORM FEATURES

SAVE TIME. INCREASE MARGINS.

Referral process

Eligibility

Patient completes the eligibility form; submissions appear in your platform queue.

Records

Check eligibility and upload records straight to the patient's profile.

Referral

HHH refers to clinic; status tracked on the platform.

Consultation

Specialist consults remotely (£30); if appropriate, a prescription is issued.

Rx processing

Receipt

Prescription arrives securely; the platform links it to the patient.

Payment

Send a secure payment link and tracks payment status through platform.

Ordering

Build the order with live stock and price checks.

Collection

Mark goods in; the platform notifies the patient to collect via email.

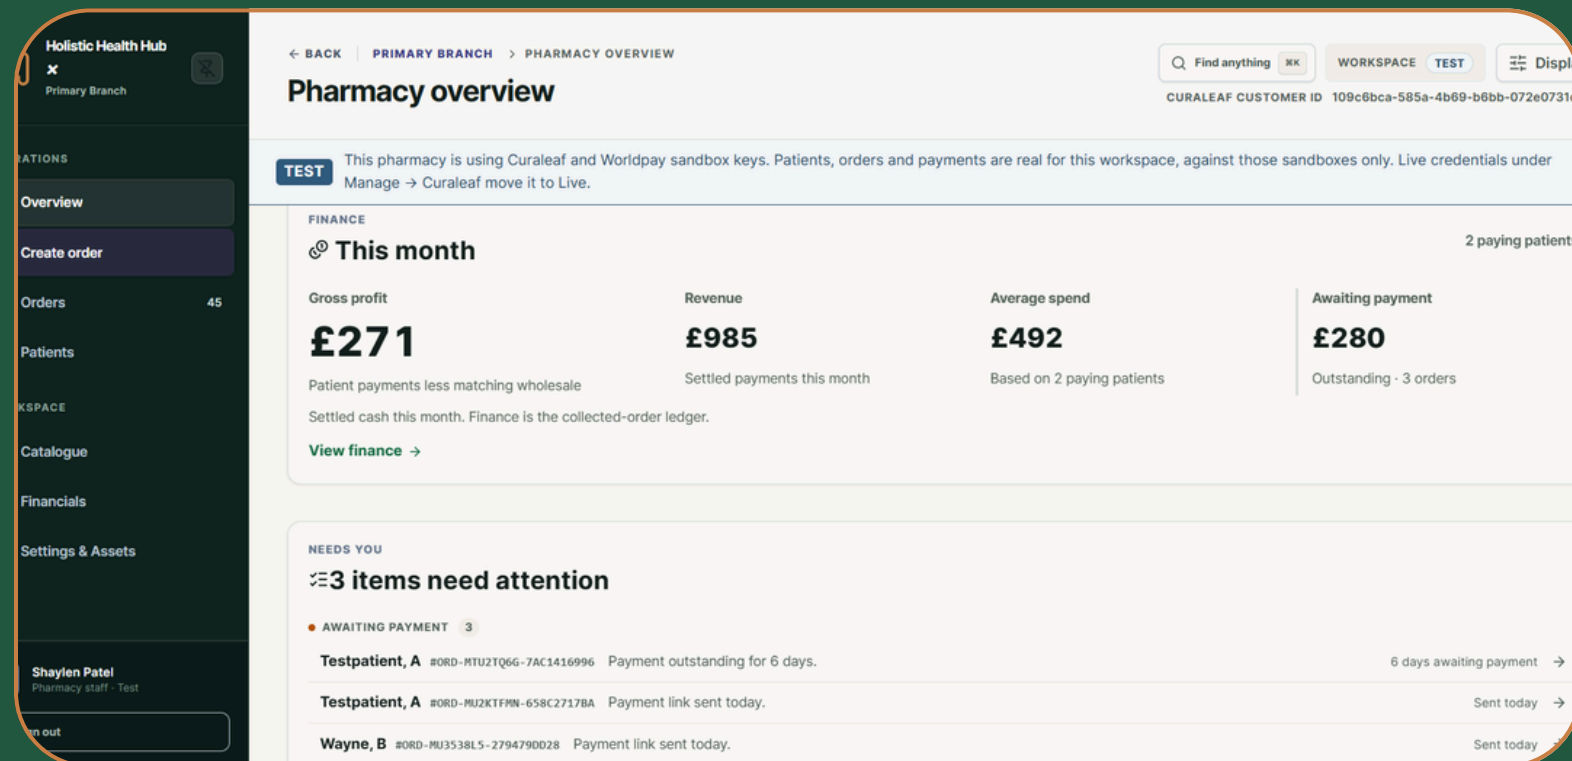

The platform runs quietly inside PharmSmart, so nothing about your day changes. Every order is gated to a valid prescription, checked against the 28-day window. Stock and price are confirmed before you commit, and patients pay by secure link before anything is ordered. All that's left for them is the part that matters: collecting their medicine from you, their trusted pharmacy.

Dashboard

Track your progress and easily navigate to outstanding tasks

A live dashboard shows exactly what needs attention today and what the service is earning. Every paid transaction is recorded automatically so you always know what your new private service is worth.

Actionable insights

Track success

Referrals

A referral pipeline that runs itself

PRIVATE PRE-SCREENING · ABOUT 2 MINUTES

Remote onboarding

Payment processing

Take payments for prescriptions effortlessly

The screenshot shows the Hartwell Pharmacy payment processing interface. At the top, it says "Test Mode - This is not a live transaction." Below this, there is an "Order summary" section with a reference number and an amount of £85.00. The "Payment details" section includes fields for card number, cardholder's name, expiry date, and security code. The "Billing address" section has fields for first and last name. A "Close" button is visible in the bottom right corner of the form.

Save admin time by texting/emailing secure (your pharmacy branded) payment links to patients. Through Worldpay, we offer an optional competitive pay-as-you-go rate of 1.3% + 20p per transaction—with no setup, monthly, or minimum fees. Collecting payments first, through the platform mitigates waste. Once confirmed, orders are placed automatically with the supplier.

Easy payments

Worldpay integrated

Live formulary

Search for stock and effortlessly create an order for your patient

The screenshot shows the live formulary interface. At the top, there is a search bar labeled "Search medicine, strength or form". Below this, there are filters for "All 210", "Flower 167", "Oil 23", "Vape 18", "Lozenge 1", and "Other 1". The main table lists products with columns for "PRODUCT", "PACK", "STOCK STATUS", "PATIENT PRICE", and "ADD". The products listed are "4C Labs BWD T30 Beach Wedding", "4C Labs CCK T26 Cold Creek Kush", and "4C Labs DB T26 Death Bubba". The "STOCK STATUS" column shows "In stock" for the first product and "Out of stock" for the others. The "PATIENT PRICE" column shows £85.00, £60.00, and £77.50 respectively. The "ADD" column has a checkmark for the first product and "+ Add" buttons for the others. On the right side, there is a "PATIENT" section for "Bruce Wayne" and a "BASKET" section showing the selected product and its price. At the bottom, there is a "PHARMACY COST" section showing the wholesale cost and margin.

Browse the live formulary, check availability and pricing in real time, then assign products directly to prescription order, send a payment link to the patient and transmit the order to supplier and track delivery — all in one flow.

PARTNERSHIP TERMS

FAIR TERMS.
NO LOCK-IN.
NOTHING HIDDEN.

Built for Community Pharmacies. 100% Risk-Free.

We'd rather you knew exactly how this works: the clinic funds our referral and onboarding work and your dispensing margin stays untouched. No hidden fees.

Zero Monthly Subscriptions

No fixed monthly fees, no setup costs, and no lock-in contracts.

Full Launch Support Included

Onboarding and platform setup are handled for you in full.

Integrated Payment Processing (Optional)

Offer seamless remote payments at competitive, transparent rates: 1.3% + 20p per transaction. You only pay when you make a sale.

Free Marketing Designs

Get custom-designed posters and leaflets for free—print them yourself or order through us (offered at cost price).

Total Freedom

Leave whenever you like with zero exit penalties. If it's not working for your pharmacy, walk away anytime.

*Note: Eligibility form integration onto your website is handled directly by your existing web developer.

HEALIUS PHARMACY CONSULTING

Service Set Up & Ongoing Support

Launched properly, without overloading your team or disrupting your core business.

We are the consultancy behind Holistic Health Hub. Our team consists of pharmacists who specialise in launching new private services inside community pharmacies. That includes setting up the service, ensuring compliance, implementing marketing strategies and providing ongoing support to ensure the success of the service.

1 We onboard you with partners

We onboard your pharmacy with the specialist clinic, the manufacturer/distributor, Pharmsmart and the HHH platform — accounts opened, supply terms negotiated, formulary loaded, users set up.

2 We provide clinical governance support

We equip your team with training and reference guides to run the service seamlessly. To ensure clinical governance, we supply pre-drafted SOPs and risk assessments ready for your Superintendent's sign-off.

3 We build your marketing strategy

A launch strategy tailored to your pharmacy: a text campaign to your existing patient base via PatientSmart, leaflets, posters, digital advertising, website copy and your own branded eligibility form and QR code. Only pay for texts or prints (FREE PDF provided if you want to print yourself and FREE digital ads for your TV screen/social media)

4 We onboard your patients — every day

Once you're live, every patient who registers interest is contacted by our team, taken through the eligibility check and referred to the clinic on your behalf. You introduce the patient; we do the rest. If there are any issues or concerns we are here to support you.

Service delivery partners

Everything this service needs, already connected. You just dispense.

No cost to join · You keep the full margin · Your patients stay yours.

FAQs

- **Does my team need specialist training or insurance?**

No. Diagnosis, eligibility decisions and prescribing liability all rest with the GMC-registered specialists at Curaleaf clinic. Your pharmacy dispenses and hands out medication. Your current indemnity cover would cover you here also.

- **How much admin time will this add for my dispensers?**

Very little. Because the workflow runs natively inside PharmSmart, processing an HHH private script takes less time than any routine private Rx. This is because the platform handles payment and ordering saving you valuable admin time.

- **Do patients really want face-to-face collection?**

Yes! The market started with DSPs (distance selling pharmacies), but many patients want what the online model can't give them: a familiar professional, a real conversation, and continuity of care from the pharmacist they already trust.

- **Is this legal?**

Yes. Cannabis-based medicinal products have been legal to prescribe in the UK since November 2018, by GMC specialist doctors only. Prescribing happens at Curaleaf Clinic (CQC-registered); you only dispense against a valid private prescription, as you would any Schedule 2 CD.

- **Is medical cannabis actually a growing market?**

Yes. UK patient numbers are on track to double to 140,000 in 2026, with a market value projected to reach £935m by 2030 — the same explosive curve Germany, Australia and Canada have already followed.

- **Do my staff give clinical advice?**

No. All clinical decisions (eligibility, prescribing, dose changes, side effects) sit with the clinic's specialist doctors. Your pharmacist provides the same professional checks and usage counselling as for any dispensed Schedule 2 medicine — nothing beyond familiar practice. For anything more, patients are signposted back to the clinic, which has its own clinical pharmacists, nurses and dedicated patient liaisons — so your team is never the last line of support.

YOUR COMMUNITY. YOUR PHARMACY. YOUR SERVICE.
